

## TECHNICAL DATA

## FF SALAD PACKING TABLE

“

Forsfood Salad packing table is intended for efficient manual packing of salads and vegetables. Products can be packed into a bag or a box. The design of the table is space-efficient and easy to keep clean and hygienic.

The device has a wide range of ergonomic adjustment options. As standard, there is a scale integrated into the table. The scale makes packing a predetermined amount of products easy and fast. There is no need to move the packing to another place just for weighing it, which saves a lot of time.

The salad packing table only needs electricity for the scale and the frame is made of stainless steel.
